DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Deering et al (US 2002/0005854 hereinafter "Deering").

Deering teaches a graphics system (Fig. 3) comprising a set of graphics accelerators (150); and a series of filtering units (170), wherein each of the graphics accelerators coupled to a corresponding one of the filtering units; wherein each of the graphics accelerators (Figs. 17, 20 and 21 and respective areas of the specification) is configured to (a) generating a stream of samples in response to received graphics primitives, (b) add a corresponding dither value to the color components of the samples to obtain dithered color components, (c) buffer the dithered color components in an internal frame buffer (162), and (d) forward truncated versions of the dithered color components to the corresponding filtering unit (170); wherein the filtering units are configured to perform a weighted averaging computation on the truncated dithered color components to determine pixel color components (abstract, paragraph 121). Therefore, at least claims 1-24 are anticipated by Deering.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the

Art Unit: 2676

unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-24 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-52 of copending Application No. 09/760,512. Although the conflicting claims are not identical, they are not patentably distinct from each other because they appear to use different terminology for means which perform the same functions, for example, filtering unit or sample-to-pixel calculation unit.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
